Safety Corner

South Brunswick Township Transportation has YOUR safety as our main concern. For this reason we do not allow passengers to move around the bus while it is in motion.

Passengers should find their seat as quickly as possible upon boarding the bus. Passengers, once seated, may not move around the cabin until the exit door is opened by the driver at the final destination. Passengers who get up to change seats while the bus is in transit (for example- at a stop light or another passenger's stop) risk injury from a fall as at any time the bus may begin to move or stop moving unexpectedly. If the driver applies the brakes or accelerates with passengers standing, it is easy for the change in momentum to cause the passenger to lose their balance and fall, resulting in injury to that passenger.

South Brunswick Township Transportation has only YOUR safety as its main concern. Please help our drivers to deliver you safely to your destination by remaining seated while the bus is in motion.

Thank you in advance for your compliance.
